

## סיכום אפשרויות מעבר מידע באנגולר

### Property Binding

```
<div [innerText] = 'value'> </div>
```

```
<div [importance] = 'value'> </div>
```

```
<img [src] = 'value' />
```

```
<div [style.background-color] = "theColor"> </div>
```

```
<div [style.background-color] = " myErr ? 'red' : 'blue' "> </div>
```

### interpolation

```
<div> {{ myStr }} </div>
```

```
<div> {{ f1( ) }} </div>
```

### Event Binding

```
<button (click) = ' f1( ) '> </button>
```

### Two Way Binding

```
<input [(ngModel)] = "title" />
```

Note: We'll need to add

```
import {FormsModule} from '@angular/forms'
```

imports:[FormsModule, ...],

in app.module.ts

any typo?
