

# Tasks:

1. Inside our  
“angularProjects” folder  
Create Angular project  
named exercise1:

```
-- cd into angularProjects  
folder  
—ng new exercise1  
—ng serve
```

2. Create component named  
theInfo which displays:

div  
input  
button

When the user types into the  
input box,  
The div displays what the  
user typed.

When the user clicks the  
button the div shows:  
“Hello, the button was  
clicked”
